PUBLIC NOTICE

Regarding Modifications to the Kent Facility RCRA Part B Permit

October 31, 2003

Burlington Environmental Inc., a wholly owned subsidiary of Philip Services Corporation (PSC), has modified the RCRA Part B Operating Permit for its Kent facility. In accordance with Washington State Dangerous Waste Regulations Chapter 173-303-830 WAC. These changes are classified as Class 1 modifications, under the three tiered modification system established by federal and state regulations. Of the three classes of modifications, Class 1 modifications are the most minor and do not substantially affect facility operations.

FILE COPY

General Facility Operations

PSC's Kent facility, located at 20245 77th Ave. S. Kent, WA 98421, is a commercial dangerous waste management facility. Treatment processes include treatment of household hazardous waste, consolidation of dangerous and household hazardous wastes, wastewater treatment, and stabilization. There is no disposal of dangerous wastes on site.

Summary of the Modifications

KTMOD15-1: This modification incorporates the inclusion of "equivalent material" language into the permit conditions:

Equivalent materials/information. If certain equipment, materials, and administrative information (such as names, phone numbers, addresses) are specified in this Permit, the Permittee is allowed to use an equivalent or superior item. Use of such equivalent or superior items shall not be considered a modification of the Permit. However, the Permittee must provide the Department with changed pages for the applicable permit attachments reflecting the change within seven (7) days of making the change. The Permittee must place the revision in the operating record (prior to its institution), accompanied by a narrative explanation and the date the revision became effective. The Department may judge the soundness of revisions and take appropriate action.

The Part B Permit, the modifications presented above, and supporting documentation can be reviewed at:
